

Bead Woggle

You will need:

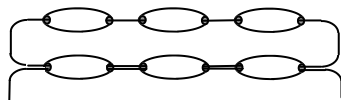

- 27 beads
- Thin elastic 9 –12 inches long

Method

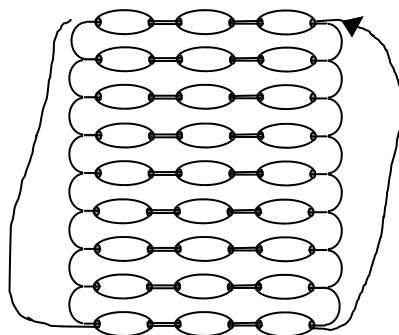

1. Place elastic on the table and find the centre.
2. Thread three beads on to the elastic making sure that they are in the centre of the elastic.

3. Thread three more beads on to the elastic, then thread the other end of the elastic back through these beads, so that both pieces of elastic are through the second row of beads in opposite directions. Make sure that the centre bead remains in the centre of the elastic.

4. Gently tighten the elastic that has gone through the beads
5. Repeat instructions 3 and 4 until all beads are threaded on to the elastic making nine rows.
6. Thread one end of the elastic back through the first row. Pull gently into a circle and tie a knot, hiding the knot in the beads.

Leaders Notes:

To make the Russian flag design, use nine white, nine red and nine blue beads. Make sure that the beads are threaded in the correct order—red, blue and white to create this design.

Different colours can be used to create various patterns of your choice.
